Association Members Candidates for Metro

By GEORGE FLAVELL, P. Eng.

Professional Engineer A. F. Ford has thrown his slide rule into the ring for a seat in the Metropolitan Council.

This decision came at the suggestion of a group of friends and business acquaintances who felt he had many qualities desirable for position in Metro.

A. F. FORD, P. Eng.

Aside from his engineering background, Mr. Ford is owner and manager of the Canadian Corrugating and Stamping Co., providing him with first-hand experience in the business world. His plant is located in St. Vital, and he resides in Fort Garry, both districts being in the Metro Division he will contest.

Mr. Ford has no political experience or affiliation, feels this should be an advantage, as Metro should be non-political.

A heavy-set man, his broad shoulders reflect his prowess as a swimmer in his younger days. He held the Canadian Championship for the 200 and 500 yards in the 1920's. For those who can remember the 3-mile international marathon swims down the Red River in the 20's, Mr. Ford participated in that event, and received his share of the awards. He has been President of the Manitoba Swimming Association and was referee for swimming at the British Empire Games in Vancouver a few years ago.

Naturally, one particular responsibility of Metro in which he will be interested is study of river pollution. Winnipeg's rivers are close to being open sewers, claims Mr. Ford.

Born in England, he has lived in Canada since the age of 6. He received his degree in civil engineering from the University of Manitoba in 1930. He is married, with a grown son and daughter.

Certainly an engineer should be included in Metro... We wish Mr. Ford success in this new venture.

✦ ✦ ✦

L. E. OSTRANDER

The engineering profession has been taken to task from time to time for lack of interest in public office, in comparison with other professions. It is, therefore, of interest to note the name of L. E. Ostrander, P. Eng., among the list of candidates for Metro.

Lawrence Ellis Ostrander, born in Otterville, Ont., attended school in Brantford, Ontario, and the School of Practical Science, University of Toronto. After service overseas with the C.A.S.C., 1916-1918, he joined the G.T.P. Railway, later the C.N.R., at Winnipeg, as Resident Engineer. In 1950 he was appointed Industrial Commissioner for the C.N.R. Western Region, the position he holds to date.

He is a Past President of the Industrial Development Board, and Community Planning Association of Winnipeg, Past Vice-President of the St. Boniface Advisory Planning Commission and Past Member of the Metropolitan Town Planning Commission of Greater Winnipeg.

Current activities include membership in the E.I.C., A.P.E.M., Winnipeg Chamber of Commerce and the Provincial Tourist and Convention Bureau. He is also Manitoba delegate to the Provincial Mines Ministers Conference.

Married, and the father of four daughters, Mr. Ostrander resides in Norwood, and is a candidate in Division 7 for the October 26th election of Greater Winnipeg's first Metropolitan Council.—I.W.T.

✦ ✦ ✦

CONGRATULATIONS

To Donald W. Miller and Patricia Chippendale Miller who were married on April 16, 1960.

To Mr. and Mrs. L. M. Harrs on the birth of a son, Paul Henry, on May 29, 1960.

To Douglas R. Dawson and Marjorie Gottfred Dawson who were married on June 25, 1960.

To Editor and Mrs. R. Craig Sommerville on the birth of their fourth daughter, Margaret Lynn, on June 2, 1960.

To Erwin and Judy Weiszmann on the birth of their daughter, Ann Juliette, on August 17, 1960.

To Mr. and Mrs. R. H. Banks on the birth of a daughter, Carol Anne, on July 15, 1960.

To Mr. and Mrs. S. G. Anderson, on the birth of their son, Alan Glover, on July 27, 1960 (B.Sc. E.E. Manitoba class of 1982).

To Gordon Trotter and Betty Margaret Hornbuckle Trotter who were married in England on August 20th and returned to Canada aboard S.S. Homeric.

To Mr. and Mrs. I. W. Thomas on the birth of a son, Ian William, on October 3, 1960.

To Larry Hurwitz and Sandra Ludwig Hurwitz who were married on June 26, 1960.

To A. F. Eshmade and Gudbjorg Hislop Eshmade who were married on August 27, 1960.

Special Meeting
On the Subject of New Quarters

WESTINGHOUSE AUDITORIUM S.E. Ellice and St. James Street

President's Report

By W. L. WARDROP, P. Eng.

Fall activities of the Association are under way with several of our committees hard at work. The Fall golf tournament was a huge success and attendance at the Fall Frolic broke all records for this event. Council has completed arrangements for a special meeting of the membership for Tuesday, October 25th, in the Westinghouse auditorium to consider the question of the Association acquiring permanent premises. It will be recalled that the annual meeting directed Council to hold a special meeting so that this important subject could be dealt with adequately. A copy of the Advisory Committee's report on this subject has been distributed. Council has given a great deal of consideration to this question and has assembled certain pertinent information which will be presented at the special meeting. There is some doubt on the part of Council as to our financial capability of proceeding with such an undertaking at this time, although I think it would be correct to say that your Council feels that the acquisition of permanent quarters would be a desirable move when the membership reaches the point where it could financially support such an undertaking. It is hoped that a large number will turn out for the special meeting so that this matter can be discussed and the wishes of the membership carried out. Unfortunately, I have to be in Niagara Falls at that time presiding at the annual meeting of the Canadian Institute of Sewage and Sanitation but Prof. R. E. Chant, your Vice-President, will preside in my place.

There are a few important considerations facing our profession today. We will be required to sort out in our own minds the values inherent in our profession and decide whether we are on the right course or if certain changes should be considered. At the present time, the Ontario Association is faced with a very concerted movement amongst a portion of its members for radical changes in the objectives and structure of the Association. This is somewhat difficult to understand because of all the provincial Associations, Ontario seems to have led the way in meeting the demands for those activities outside of the strictly legal aspects of practising professional engineering. If the objectives of this new reform group were simply that not enough is being done by the Ontario Association, then it would follow that certainly there is room for concern by the other Associations. Because of the large proportion of membership in Ontario, Canadian Council is concerned about the effect on the whole engineering profession. It is hoped that steps can be taken by Canadian Council to find out how the membership feels about this whole matter and if modification is indicated to meet the change in times, then such can be brought about in a proper and orderly approach.

This is a matter not to be taken lightly for in spite of what certain groups might think the profession enjoys many privileges. It would be fallacy to follow a course which would jeopardize any of these privileges. It would appear that this very point is being realized more and more by our neighbors to the south, because in the last few months groups of professional engineers in certain of the larger companies have voted to withdraw from organizations having collective bargaining as one of its main principles. It was reported recently that ... "Union movement amongst engineers in the United States is rapidly declining. The only national federation of engineer unions, Engineers and Scientists of America was organized in 1952 and expanded rapidly; by 1956 it reportedly had a membership of 25,000 representing some 43,000 engineers. Since then, however, the trend has changed and through the disappearance of some groups and disaffiliation of others, the Federation now has less than 10,000 members with representation under 18,000. In May of this year, some 6,800 engineers employed by Western Electric in 20 plants in the U.S. rejected union representation." This is most encouraging for the engineering profession for such a course would be wholly detrimental to the standard of our profession.

It was my privilege this past month to represent Canadian Council at a meeting of the joint national Architects-Engineers Committee. This is a recently established committee between members of the Canadian Council of Professional Engineers and the Royal Architectural Institute of Canada. The objectives of this committee are outlined as follows:

1. To develop better understanding between members of the two professions.
2. To assist in maintaining and developing proper relations between architects and engineers in the best interest of the public they serve; and
3. To provide a means of co-operation on problems which are of interest to both groups and national in scope.

Discussion was held on areas of mutual interest in the matter of town planning, fees and code of ethics. Other items on the agenda included the equality between the architectural and engineering professions and possible joint implementation of the RAIC report on the Design of the Residential Environment. The latter is a typical example of the value which might have been gained from a closer liaison between the two professions. How much more effective this report would have been had it been prepared jointly by architects and engineers. It dealt with a subject in which engineers are vitally concerned and are actively engaged probably as much if not more so than architects. As it is there are but one or two minor references to the part played by engineering. The net result — the public was made aware of the architects role in the Residential environment. We can not blame the architects, for it is really our own problem. If we are to be equally recognized we must make our profession known. We must ensure that we are associated with the work of our profession. Joint committees on the provincial and national levels can do much to promote proper understanding between our two professions.

It might be argued that only consultants have common ground with architects. This is partially true but we must not forget the several members of our profession employed by architects, or the many engineers who hold management positions in industry and engage the services of architects. Undoubtedly, there are many areas of mutual interest but no room for such inequalities as exist in some areas where it is proper for an engineer to be hired as a salary employee to an architect but not acceptable for an architect to work on a salary basis for an engineer. When there is equality in both professions there will follow proper understanding and a mutual admiration for the endeavors of the members of both professions.

✦ ✦ ✦

WELCOME BACK

We are indeed pleased to welcome Jack Hoogstraten back to Manitoba. A former President of this Association, Jack Hoogstraten has been appointed a Vice-President of the University of Manitoba.

✦ ✦ ✦

ENGINEERS IN TRAINING

The following have been enrolled as Engineers in Training:

H. S. Amos, R. Billinton, W. D. Buhr, W. Hanuschak, C. J. Love, C. M. Pratt, V. G. Rowe, G. Schultz, R. D. Zeidman, E. S. Smendziuk, T. J. Monastyrski, C. D. Holmes, J. P. Dean, R. C. Wilson, C. A. Sankey, K. C. Foster, A. C. Mackay, J. L. Hiley, R. A. Stokes, C. Crust, G. J. Greer, S. C. Peng, L. F. Schmidt, C. B. Dawley, G. B. Strange, W. Miller, L. A. Buhr, H. J. Berry K. A. Hamman, M. G. Williams, B. J. Rossen, R. M. Gordon, G. G. Swan, F. L. Pedrick, G. W. Kruk.

✦ ✦ ✦

Flashback

North of 53 Men Entertain at Tea Party
(From the Winnipeg Free Press, issue of Jan. 28, 1936)

North of 53 parties have become a matter for men. Saturday, January 11th, a group of young men entertained at high tea at their camp, Range 3, Lat. 55. The table was tastefully decorated with spruce boughs and poplar twigs, and Mr. W. Hayward presided. The guests included Messrs. Jack Brooks, Andrew Taylor, Bruce Vermilyea, Angus Kennedy, Rupert Chataway, Charles Johnson and Edward Magill.

Record Crowd Attends Fall Frolic

By S. J. Armstrong

The fifth annual Fall Frolic drew a record crowd at the Winnipeg Badminton Club, and judging by the noise and the reluctance to call it a night, a good time was had by all. A hearty vote of thanks goes to Jim Warrener, Charlie Pike, Evan MacKenzie and other members of the Social Committee for the amount of time and effort they put into this dance.

Marsh Phimister presented the annual awards during intermission. The first went to Mrs. D. R. Dawson as the best trained bride of the year. When the Dawsons were married in June their friends naturally decorated their car with suitable inscriptions and Marj's first duty was to help Doug wash the car out on the perimeter highway. As her prize Marj was given a brush for car washing and a very large pair of rubber boots. Fred Young, the Man with the Harem, was given a prize for courage. Fred tried to bring two dates to the dance, his wife and a lovely blonde. The Grande Larceny award went to Bud Thorsteinsson who inadvertently took the wrong fur coat from the office of the attorney general. Jim Macdonald received the annual good housekeeping award and his name will be suitably inscribed along with those of Cam Warrender, Craig Sommerville and Bill Corbett. As an added prize Jim was presented with a combination door stop and planter manufactured by Building Products. This presentation was made by Don Elliott. The final award was that for Gourmet of the Year and went to Brian Whitfield. Brian had moved to Vancouver earlier in the year, having decided it was a far superior place to live. After a few months there, he was so homesick for Winnipeg he came back and apparently has been on a steady diet of crow ever since. In order to add a little variety to this diet, Brian was presented with a live chicken. However, as the evening wore on there was much speculation that Brian would never eat the bird. He removed the chicken from its cage and the chicken sat quietly on the table and nibbled at popcorn while Brian petted it as one would a cat. They were obviously becoming so attached to each other that it was doubtful if Brian would ever get to the point of eating his new friend.

The boys at the door were advised to let no one in without a ticket (and one that had been paid for) so there were a few problems with people who had left their tickets and/or their wallets at home. They even refused admittance to the liquor inspectors because they had no tickets.

A good time appeared to be had by all and once again many thanks to the social committee who put in many hours of work preparing for this function.

Holidays 1960

Al Grant earned a hero's medal by taking the wife and four young kids on an auto trip to Vancouver . . . camping yet!!!

Gordie Loadman, a fairly regular week-end commuter between the big town and a wigwam on the shores of Falcon, found the relative quiet of the mid-week ideal for sharpening his game on the Falcon golf course during his vacation.

Bill Thomas, who likes to rough it with the assistance of a fully modern motel, spent his vacation doing nothing at Bimidji, Minn. His wife says this U.S. custom of buying beer on the grocery bill must never be allowed to spread to Canada unless the state undertakes to support families.

Doug Dawson got married at the outset of his holidays to the former Marjorie Gottfred. On the day of the wedding he thought he would be very tricky and hide his car so that no harm would come to it. Friends like Glen Morris and Dave Holloway were just as tricky, found the hiding place and simply parked their cars in the driveway so Doug couldn't make his getaway until they moved their cars. They did manage to do a good decorating job on Doug's car so the bride's first chore in married life was to wash the car.

Ed Magill entered the Pinewood diving championships with great success. He won first prize in the jack knife dive and second prize in the swan dive, being just barely nosed out in the latter by an 11-year-old girl.

Ray Chant and his wife and family visited England and the Continent and Ray departed from engineering for a while and did a brief study on Rhine wine.

Al Burrows also began his holidays by getting married and then heading for Bermuda.

George Reshaur is saving his holidays for the first blizzard when he will lay aside his slide rule and head south.

Jovial Bill Lynn spent part of his holiday money going to the circus earlier in the year. With the balance of the $100.00 which he allots annually for holidays he travelled to the U.S. and to Alberta, living high on the hog while his fortune lasted and resorting to roots and berries when his funds ran out.

✦ ✦ ✦

By W.A.C.

When Fred Lendenschmidt went down to West Hawk Lake to commence two weeks of tranquility, he found that a beaver (or beavers — it was never determined just how many were responsible) had, with much industry, managed to lay low several large poplar trees directly across the path between the cabin and the boat house. Armed with a chain saw, he set to work to clean up the mess. Fred swears, however, that while this was going on during the day, the beaver(s) was working the swing shift. As the holidays wore away, the cordwood piled up with no seeming end in sight. Anyone for good cheap firewood?

"Where did you spend your holidays, Larry?"

"Lake of the Woods" replied Larry Sylvester.

"Enjoy 'em?"

"Well, parts of it I don't think I liked."

"Oh, how come?" And with this little question we unlocked the pages on a hair-raising experience rivalling in thrills those told of the bounding main.

Out from sight of land (on the Minnesota side), Larry tells us, he and his brother were in an outboard cruiser when they were lashed by one of the worst storms to hit the area in many a year. As the wind increased and the waves became higher, they lost their steering gear and were in danger of being swamped. Fortunately, another small boat in the area came to their rescue, placed their boat in tow and took them aboard. It looked like a small blessing, however, when later their boat went adrift, one of the other crew was knocked unconscious because of the violence of the boat's motion, and they were in danger of running out of fuel. With dextrous manouvering they managed to stay afloat.

Four hours later, the storm abated enough so they could make their way to an island.

The next day an aircraft spotted their own boat on a swampy reef and dropped them off to retrieve it. After about half a day's labor, they managed to get it into open water and made their way to Kenora.

"So you see," says Larry, "part of my holiday left a little to be desired."

"We see what you mean" we replied and left drying our sweaty palms on our trousers.

NEW MEMBERS

The following have been registered as members of the Association of Professional Engineers of the Province of Manitoba:

F. Aysan, I. H. Bassin, E. N. Bunio, S. Goodbrandson, H. L. Hensel, J. W. Holmes, D. Jack, E. H. Klassen, R. C. Kruger, R. Laak, S. F. Liss, D. M. Onysko, W. A. McBean, R. S. Morrison, L. H. Pakulak, J. C. Peters, H. C. Sage, W. M. Shaw, J. R. M. Stephenson, G. A. Swanson, C. L. Wong, J. W. W. Wright, F. E. Estabrook, H. C. Clowes, W. W. Spence, E. A. Spears, G. R. Thompson, W. D. Alexander, V. M. Austford, R. P. Barschel, J. L. Bremner, T. P. Cates, R. R. Dutka, A. O. Dyregrov, A. W. Fia, G. S. Grais, J. Hotchkiss, W. C. Kent, A. D. Myska, G. H. Pinch, D. B. Sigurdson, J. R. Spronken.

✦ ✦ ✦

Spring Golf Tournament Draws 102

FLAVELL HAS PULL WITH WEATHERMAN

By T. Ahwff

When George Flavell plans a golf tournament he takes care of every little detail, even the weather. If tee-off time is 12 noon, the rain will stop at 11:59, and shame on those few skeptics who didn't show up because of the morning's rain. The tournament proved two things about our members:

(a) Neither rain nor cloud nor gusty winds will turn them from their chosen athletic path.

(b) They'll do anything to get out of work.

Despite the threatening weather, 102 were away and swinging from the first tee, and when all the divots had been dug, 95 stayed for a luscious filet mignon dinner at the Southwood dining room. Needless to say, your Sports Committee was very pleased with this fine turn-out.

R. C. Blackman came in from Brandon, arrived before the rest of his foursome who only had to come from the Legislative Building, and then he walked off with the prize donated by Canada Wire and Cable for the low net score.

M. D. Green was the low gross winner with a 77 and won the Canadian General Electric prize. J. Lewis won the Canadian Westinghouse prize for the second low net, and H. Montgomery won the second low gross prize (a most practical and useful liquid prize) donated by Canadian Johns-Manville. Hidden hole and birdie prizes of golf balls were donated by T. McAvity & Sons and Northern Electric.

The success of the tournament can certainly be attributed to the excellent tri-lingual notice sent out by Sports Committee Chairman

George Flavell, to the fine work done by his committee members, Harry Benditt, Bill Lynn and Cliff Reade, to J. Woskowski of the City Hydro and Mrs. Dunklee who looked after registration and the collection of funds, and to the intrepid golfers themselves. We would also like to acknowledge the co-operation given us by the Southwood Golf and Country Club who looked after our needs and provided an excellent dinner. Due to the large turn-out the Committee had to work half way through the dinner working out the handicaps and deciding the prize winners and a precedent was set in this connection — no one on the committee won any of the major prizes.

Tee-Time Tidbits — D. W. Miller checked with the weather office and was an early starter and the best dressed golfer of the day. Among the latest to arrive were Dick Galbraith, Bill Corbett and Bob Gottfred who had attended the stag for Doug Dawson the night before. Al Burrows' score indicated he has his mind on his newly acquired fiancee and not on his golf. Social Committee members Evan Mackenzie and Charlie Pike took the opportunity of attending a function that someone else had to plan. Other committee members who attended were Bill Isberg, J. Lewis, J. Greenaway, Gordon Christie, Ben Fast, Glover Anderson, R. D. Cahoon, J. D. Adam, F. Farish and Bill Adams. We were happy to see some of our newer members — D. M. Onysko, S. Goodbrandson and T. Monastyrski. A. W. Bell was a double winner. For his gross of 165 he was presented with an oversized golf club and ball, and for when he improves, 2 regulation balls. Bell's 23 strokes on the 13th hole was undoubtedly a record — he led the pack by a good margin on this hole (par 5). Perhaps Evan Mackenzie or R. P. Barschel, who made this hole in par, might be available for a few lessons. Vice-President Ray Chant arrived in time for the 19th hole and the dinner. J. A. Flatt, George Fanset and Jim Macdonald started off in a splendid fashion with birdies on the first hole. W. B. Hawcroft made a less auspicious beginning with 13. Others who had birdies were R. W. Hicks, J. S. Roper, R. E. Gottfred, R. D. Cahoon, J. C. Trueman, S. O. Thorvaldson, M. D. Green, J. L. Greer and E. F. Mackenzie. One foursome tried to tee off without first registering (and paying up) but Mrs. D. took off like a hound at the sight of the fox and headed them off. George Flavell made an excellent M.C. and we are certainly indebted to him for a job well done. The turn-out of 102 far exceeded the former high of 61. As George pointed out in his advance notice, The Greeks had a word for it, and the Romans had a word for it and we have words for it too: Flavelli Summa Cum Laude, which means Bully For You, George.

✦ ✦ ✦

ESMERALDA IS DEAD

WHAT'S MORE, SHE WAS TOUGH

After the Fall Frolic we had several inquiries regarding the disposition of Esmeralda, the chicken won by Brian Whitfield. For two days our inquiring reporter tried in vain to locate Brian Whitfield and it was feared he had contracted a chicken virus, chicken pox or was out being deloused. Fortunately he is in excellent health but as he said, "That's more than I can say for Esmeralda." The Whitfields kept Esmeralda in their apartment Friday night after the dance. Saturday morning they decided both they and she needed a little fresh air so they put her on the balcony. They fed and watered her well and planned to take her to the University chicken farm to further her education because they didn't feel they could eat her. However, a neighbor was not quite so squeamish and he took Esmeralda and had her for Sunday dinner and it was he who reported that she was a tough old hen. At least Esmeralda had one last fling before she hit the stew pot, as she certainly seemed to be having a good time at the dance.

WINNIPEG

The appointment of Mr. F. M. McGuire as District Manager in charge of Company operations located in the Winnipeg-St. Boniface area has been announced by Dominion Structural Steel Limited.

Mr. McGuire has been transferred from the Company's Ottawa District where he was Plant Superintendent, and brings with him a broad background of experience in sales, design and production. A native of Woodstock, N.B., Mr. McGuire is a graduate of the University of New Brunswick, in Civil Engineering.

✦ ✦ ✦

Public Relations Committee

By W. N. Isberg, P. Eng.

We hope that no one was offended when they read our recent orange coloured letter about the roster information card. The letter was intended to be provocative. It was hoped that it would arouse a bit of controversy and interest, and that it would result in receiving a larger proportion of the cards sent out.

When the letter was written, we had less than half of the cards returned, and the numbers being received had fallen off drastically.

Happily, the letter apparently aided in accomplishing an eventual 95% return by the deadline of September 20th. As a result, the new edition of the roster which is now being prepared, will be much more accurate than it might have been.

Incidentally, none of the errors reported in the letter were falsified.

The Public Relations Committee have prepared a booklet entitled *The Engineering Profession,* which is being distributed to high school students in Manitoba on the occasions when members of the committee are at the high schools addressing the students. Copies of this booklet are available at the Association office. If you would like to have a copy or would like one sent to a student who is considering engineering as a career, please contact the office.

✦ ✦ ✦

What's Your Name Again??

By S. J. Armstrong

The first returns from the card that was sent out to get information for the roster were discouraging. About 50% of the cards were not filled out as requested. The most common error was, "Smith, A. Q." instead of "Algernon Quincy Smith." So the Public Relations Committee sent out a follow-up letter. They wrote an essay explaining that a surname was a last name, that initials did not constitute a full name, etc., and they asked those members who had not sent their cards in (or had sent them in blank) to have another go at it. The form was reproduced on the bottom of the letter for this purpose.

The returns flowed in immediately. The first was from "Smith, A. B." The fourth one bore no name at all but did give the occupation as "Associate Professor, University of Manitoba." This was followed in the next mail by two more cards from University professors, both "Smith, A. B."

However, excluding the university staff, the ratio of accurately filled-out cards increased after the letter of explanation as to what a surname was, and what was meant by a full name. In fact, there was a definite trend indicated. While the first returns were approximately 50% accurate, after the Public Relations Committee essay was digested by members, the percentage of accurate returns took a big jump to 52.4% (excluding the aforementioned university staff).

We're too busy at the moment correcting cards to figure out the moral of this story but there must be one somewhere.

✦ ✦ ✦

PINE FALLS

By N. B. Ede, P. Eng.

T. N. McLenaghen, P. Eng., is to be congratulated on his promotion to Manager of the Manitoba Paper Company, Limited.

At the same time as the above promotion took place, there were several changes in personnel. J. F. Williams, P. Eng. (Ont.), was transferred to Pine Falls to take up the position of General Superintendent. His position at Iroquois Falls, Ontario, of Resident Engineer was filled by D. D. Munro, P. Eng., Resident Engineer at Pine Falls for the last eight years. Mr. and Mrs. Munro were guests of honor at a farewell party when they were presented with gifts by the townspeople as thanks for their work in the community.

W. C. E. Wood, P. Eng. (Ont.), has arrived to fill the position of Resident Engineer in Pine Falls. Mr. Wood was formerly with Abitibi Power & Paper Company at Alpena, Michigan, and Port Arthur, Ontario.

✦ ✦ ✦

Fall Golf Tournament

By G. Flavell, P. Eng.

Once again the golf tournament proved to be a popular contest for our members. 92 golfers braved the elements, which turned out to be quite chilly, and 67 stayed to enjoy the dinner and witness the awarding of the prizes.

Low net, and winner of the Sullivan Cup, was D. J. Sampson. A barometer donated by Northern Electric was also presented to him for his feat.

Low gross winners were Mike Green and R. McKinnon, both with 85's. Mike received an electric clock donated by Pioneer Electric, and Mr. McKinnon was presented with a score recorder, donated by Supercrete.

Winners of golf balls were:

2nd low net, Brian W. Dowsley.
Low gross 1st 9, Cliff Reade with 44.
Low gross 2nd 9, George Weldon, 41.
High gross, Bill Isberg, 152 (Bill received special "eye-appeal" golf tees).
High 2nd 9, Stan Butcher and F. Palanuk, each 71.
High hole, B. Dowsley with 22 on the 1st.
J. Lewis with 15 on the 1st.

BIRDIES—
A. W. Greenberg, 2 on the 3rd.
J. C. Robinson, 2 on the 12th.
B. Fast, 2 on the 12th.
B. Jeske, 4 on the 9th.
H. L. Dahl, 2 on the 5th.

Vice-Pres. Ray Chant extended the best wishes of the Association to the group of athletes. The work of those who helped to make the day a success was acknowledged, namely the above mentioned prize donors; Mr. J. Baker, who registered the participants; our Mrs. L. Dunklee who assisted in this big chore, and Committee members Cliff Reade and Bill Corbett who with John Baker worked on the handicaps and declared the winners.

ED. NOTE—A great big bouquet also to George Flavell, Chairman of the Sports Committee who did a fine job in masterminding the tournament, and didn't even win a prize.
